

MyChair

GREGORY
Ergo-Eco Logical™

MyChair

"MyChair" program enables you to build your own chair to suit your specific needs. Select the back to suit your back shape, select the seat technology to provide you with ultimate comfort and correct posture then choose base, arm and accessory options to build "MyChair".

Gregory's focus has always been to provide the user with the ultimate seating experience. Ensure you choose the right seat technology for your body type, remember the seat takes 65% of your body weight. Every body is different so that is why Gregory has 3 unique seat technologies to choose from.

DUAL DENSITY posture support

DUAL DENSITY Gregory's famous seat technology

posture support

Why it works:

- The pelvis gently 'sinks' into the seat and is supported in the softer section at the back of the chair.
- The firmer foam at the front prevents the pelvis from sliding forward.
- The spine is maintained in the healthy, upright 'S' curve of good posture.
- A shaped 'waterfall' front edge Improves circulation behind the thighs.
- The original award winning design.

X-Cel Comfort

A unique seating experience which allows consistent weight distribution

Why it works:

- Evens out weight distribution through the individually placed pocket springs, thereby maintaining correct seating posture.
- Reduces seat temperature with a well circulated air flow under the seat.
- Designed by world renowned innerspring manufacturer (as used in mattresses).

Standard Deluxe

Great entry level seat technology

Why it works:

- Back of the seat is contoured so you sit into the seat.
- Pomel at the front to direct the legs in the correct position.
- Waterfall at the front of the seat to reduce pressure under the thighs.
- Anti-bacterial moulded foam
