

# Advanta

## Eco 5 Rated Environmental Product Label Explained

Products bearing the Eco 5 Rated label have been internally assessed against stringent environmental criteria and are good for the environment and human health. The Eco 5 Rating assessment considers criteria including materials, harmful substances, expected life cycle, packaging, separability, recyclability, and emissions that are harmful to the environment. Eco 5 is an internal Advanta rating and is not an independently verified or third-party certification.

To achieve an Advanta Eco 5 Rating, products must meet the following 12 criteria (where applicable): Product Life, Product Stewardship, Emissions, Separability, Recyclability, Packaging, Product Identification, Product Information, Harmful Substances, Padding Materials, Fabrics/Upholstery Materials, and Timber & Natural Materials.

### Eco 5 Rating Assessment Criteria

- |                                 |  |  |  |
|---------------------------------|--|--|--|
| <b>1 Product Life</b>           | Expected product life exceeds 12 years under normal use                                      | <b>7 Separability</b>                    | The product is sufficiently separable into constituent materials                           |
| <b>2 Product Stewardship</b>    | Product can be returned to Advanta and processed through our End-of-Life "Take Back" Program | <b>8 Emissions</b>                       | The product does not produce emissions that are harmful to the environment                 |
| <b>3 Recyclability</b>          | The product can be recycled or repurposed  | <b>9 Packaging</b>                       | The product is packaged with recyclable or reusable cardboard or plastic materials         |
| <b>4 Product Identification</b> | The product is clearly labelled and identifiable   | <b>10 Product Information</b>            | Detailed product information is available either online or alternatively in printed format |
| <b>5 Harmful Substances</b>     | The product does not contain harmful substances  | <b>11 Fabrics / Upholstery Materials</b> | The product can be upholstered in sustainable materials if an upholstered item*            |
| <b>6 Adhesives</b>              | The product uses low VOC or low emission adhesives if applicable                             | <b>12 Coatings &amp; Treatments</b>      | No coatings or treatments are applied that prevent post-consumer recycling                 |
