

Changes to the Formica Commercial Laminate range (Oct 2020)

Recent strategic changes within the Laminex group have meant that the traditional Formica Commercial Range of laminates will no longer be available for commercial application (such as desktops). Instead they will be replaced by the Laminex range.

Some colours and styles are being deleted and others substituted by new alternatives.

Please note that some of the Laminex alternatives may not be an exact match to the old Formica Commercial range. Laminex and Ergolink strongly recommend for purchasers to use and compare colour swatches to existing furniture prior to making a final choice. To best match the old colours with the new, we have been supplied the following information from Laminex:
