

Comfort Duo

Seat Cushion

Comfort Duo offers leading comfort and support that is essential for workspace health and well-being by providing two zones of varying support - Soft rear cushion and a firm front seat cushion.

Rear (Soft): The rear section of the cushion is composed of a softer foam compound that allows the sitting bones to sink into the foam, thereby preventing slumping and promoting the correct ergonomic posture.

Front (Firm): The front cushion is composed of a firmer foam compound which provides additional support for the legs, improving blood and oxygen flow and providing correct leg posture.
