

# RollerMouse Free3

## Sleeker. Faster. Freer.

A modern upgrade to the Free2, the Free3 brings the same ergonomic design and quality, with the added benefits of more speed, more buttons, better precision and optional wireless technology.

## Natural feel, natural movement.

An advanced sensor located underneath the rollerbar allows for more precise cursor movements without changing the feel.

## Slimmest design, still.

At 23mm high, the Free3 low profile helps to maintain a proper, ergonomic position. The slim design is the perfect height for use with the

## Usability.

The built in wrist rest has more padding for increased comfort. The rollerbar has more room to move with 357mm of bar access. Free3 is ideal for a variety of hand and body sizes.

## Speed without compromise.

Ten speeds range between 600 and 2800 dpi, allowing the cursor to move quicker and easier across multiple monitors or large screens.

## New features for a modern take.

The Free3 has two new buttons for forward and back to be used in most internet browsers, It also has a sturdier, aluminium base and a softer click.
