

Ergoapt Axis Laptop Stand

A Laptop Stand That Enhances Workspaces

The Ergoapt Axis Laptop Stand is a compact and lightweight laptop stand with an integrated USB hub. Combining a laptop stand with a USB hub creates a powerful solution that enhances both ergonomics and connectivity for users.

Adjustable laptop stands enhance workspace by providing ergonomic support. They improve comfort and productivity for workers by elevating laptops to a comfortable height, reducing neck and back strain and promoting better posture.

USB hubs enhance connectivity and convenience by expanding available ports for multiple devices, simplifying connections and providing fast charging capabilities.

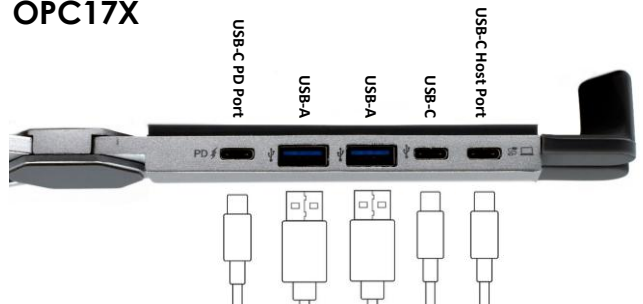

Elevate Workspaces and Efficiencies

Incorporating a laptop stand and USB hub streamlines the workspace by consolidating connections into a single, organised unit while also improving overall productivity by providing easy access to essential devices. The laptop stand promotes better posture and reduces neck and back strain, improving comfort during extended use.

Ideal for hybrid workers and those on the go, this innovative setup transforms any workspace into an efficient and comfortable environment, making it easier to manage a diverse array of devices and improving performance, accessibility and workflow.

Product Code

OPC17X

The Axis has 6 angles of adjustment and can be folded down to a compact size when not in use. The frame is crafted from aluminum alloy and silicone anti-slip pads.

The integrated USB hub expands the number of available ports, users can connect multiple peripherals for Data Transfer, Device Connection and Power Supply.

Key Features

- **Foldable Design:** The portable laptop stand boasts a foldable design that is both lightweight and compact, making it incredibly easy to transport.
- **Ergonomic Design:** With six levels of angle adjustment, users can easily customise the height and viewing angle to their preference, ensuring a comfortable viewing angle that promotes better posture.
- **USB Hub:** When connected to a laptop via the included cable, the integrated hub features a USB-C PD port, a USB-C port and 2 x USB-A ports. These ports can be used for Data Transfer, Device Connection and Power Supply. When not in use as a stand, collapse into the closed position and use as a hub.
- **Versatile Cable:** The Axis is supplied with a data/charging cable, each end is fitted with an adapter to increase the connectivity and compatibility.
- **Travel Pouch:** A pouch is supplied that can accommodate the stand and the cables.
