

# Evluent Vertical Mouse D Series

## Great fit and relaxing grip

The Evluent D Series is the latest in the Evluent range.

The VerticalMouse D retains all of the benefits associated with earlier Evluent VerticalMouse models while including design changes that offer both improved control as well as comfort.

## Relax your wrist

As with all Evluent mice, the patented ergonomic shape supports the hand in an upright neutral posture that eliminates forearm twisting.

The subtle changes in the D Series body contours encourage the hand to more naturally "curve" around the mouse.

## World's first Mouse with grooved buttons

The most noticeable design improvement are the new patented vertically grooved buttons. They provide a natural resting place for the fingertips that deliver comfort and effectively makes the mouse an "extension" of the hand eliminating any need or desire to "grip" the mouse. The end result is not only an enhanced degree of cursor precision but a more relaxed hand and forearm

## Adjustable laser sensor

The D Series features a laser sensor that ensures reliable tracking across most surfaces. A single easily-accessed pointer speed button on the side facilitates convenient adjustment without changing hand position on the mouse.

## 6 programmable buttons

Two thumb buttons are both within easy reach at the top and bottom of a contoured thumb rest. Three finger operated buttons are provided, with the scroll wheel providing a sixth button.

The 6 buttons can be assigned custom commands via the Evluent MouseManager.

# Evluent Vertical Mouse D Series

## Contoured and Textured

The contoured black portion of the body has a polyurethane coating, allowing the user to have complete control of the mouse just by resting their hand on. A lightly textured zone behind the buttons improves traction.

## Three sizes to deliver the best fit

The Evluent D Series is the first Evluent range to offer three different sizes. Available in wired and wireless the D Series is available in Small, Medium and Large.

## Dimensions

	<b>Small</b>	<b>Medium</b>	<b>Large</b>
<b>Width</b>	86mm	86mm	89mm
<b>Depth</b>	108mm	111mm	115mm
<b>Height</b>	76mm	76mm	83mm

## Size Guide

## Product Codes

<b>Wired</b>	VMDS	VMDM	VMDL
<b>Wireless</b>	VMDSW	VMDMW	VMDLW

## Compatibility

Microsoft Windows® 7 or later, Apple Mac® OS X 10.5 or later.

Includes driver for Windows 7, 8 and 10 and Mac driver for configuring the buttons.

The driver is optional but highly recommended. VerticalMouse still has basic functionality without the driver. Some functions of the Windows driver are not available in the Mac driver.
