

gregory slimline

ergonomic task chair

Experience the pinnacle of ergonomic design with the Gregory Slimline, a high-end office chair conceived with the insights of a professional physiotherapist. The Slimline is not just a chair, but a thoughtful solution designed to provide exceptional support and comfort in any working environment.

The Slimline stands out with its exceptional lateral and lumbar support and increased thoracic support. These unique features have led to its endorsement by many ergonomists and occupational therapists. It's not just a chair, it's a commitment to your comfort and well-being.

Proudly designed and manufactured in Australia, the Slimline features a fully upholstered outer back, reflecting a seamless blend of comfort and style. This chair is available in medium or high back designs, with small, medium, or large seat options, ensuring a perfect fit tailored to your unique body shape and seating preference.

A noteworthy feature of the Slimline is Gregory's award-winning Dual Density Posture Support ergonomic seat technology. This cutting-edge design ensures you are seated comfortably and correctly, reducing muscular effort to sit in the correct S-curve of good posture and improving circulation.

The Slimline also incorporates a user-friendly 3-lever independent mechanism, allowing for easy adjustment of seat height, seat tilt, and back angle for a truly personalised seating experience. The anti-slip ratchet back height adjustment guarantees your chair remains in your preferred position.

Constructed to withstand heavy-duty use, the Gregory Slimline is AFRDI 160kg certified, testifying to its robust build and superior durability.

When it comes to your office comfort and productivity, choose the best – choose the Gregory Slimline.
