

Diffrient smartTM PLUS

The Diffrient Smart Plus task chair is perfect for the office user who is looking for an ergonomic seating solution that meets the new BIFMA standards for large occupants. Designed by ergonomics pioneer Niels Diffrient, the Diffrient Smart Plus ensures maximum comfort and support using Humanscale's unique tri-panel backrest design with breathable non-stretch mesh, eliminating the need for an external lumbar support. Its weight-sensitive recline mechanism encourages healthy postures by automatically adjusting to the user without needing to make any manual adjustments.

Key Features

- **Meets new BIFMA standards for large occupants**
Holding users weighing up to 400lbs and with a seat 22" wide and 3" thick, Diffrient Smart Plus passes all requirements of a large occupant chair as per the new BIFMA standards.
- **Ergonomic solution that automatically adjusts to users**
With Humanscale's signature weight-sensitive, self-locking recline mechanism, Diffrient Smart Plus instantly adjusts to each sitter to provide perfect support without the need to modify locks and levers.
- **Restrained and consistent design**
Diffrient Smart Plus' restrained design keeps the chair from looking like an actual large/heavy chair. At 37lbs, Smart Plus weighs only a couple more pounds than a standard Diffrient Smart chair and the use of the same mesh back for both chairs ensures that the same lightweight aesthetic is maintained.
- **Tri-Panel Form-Sensing Mesh Technology**
The unique breathable, non-stretch mesh back of Diffrient Smart fits users like a tailored shirt to provide customized lumbar support in any position without the need for additional back supports
- **Responsive, pivoting backrest**
The backrest automatically adapts to the changing needs of the user's spine as they move throughout the day.
- **High-performance armrests that attach to the back**
Diffrient Smart Plus' 4D armrests can be adjusted in four different directions to fit all body types. The armrests are attached to the back frame to provide support during the full range of recline.
- **Guaranteed durability**
The Diffrient Smart Plus is made with robust materials and components and comes standard with a sturdy aluminum base. The Diffrient Smart Plus comes with an industry-leading 15 year limited warranty.

Diffrient Smart and Diffrient Smart Plus both feature:

- No manual knobs/lever adjust adjustments
- Tri-panel, breathable mesh backrest

- Holds up to 300lbs
