

Venus LED Desk Lamp

**Venus provides precise adjustable
desktop lighting.**

Blending ergonomic design with functional technology, the Venus LED Desk Lamp provides up to 50,000 hours of LED life – which equates to over 25 years of typical home office use. Flexible and easy to use, the Venus LED Desk Lamp provides precise desktop illumination.

Venus rotates and tilts on two different axes, has a solid and stable neoprene lined base, and a 10 stage light dimmer, allowing illumination adjustment from 10% to 100%, to get your desktop light conditions just right.

The Venus LED Desk Lamp is intuitive to use, allowing users to change the position of the light quickly and easily. The lamp can be folded up when not in use, to free up workspace. Single shadow LED technology relieves eye fatigue and discomfort.

Features
