Dal Norj chair

Saddle stool

Fact Sheet

Overview

The Dal Norj Saddle Chair is designed to encourage a more natural, dynamic sitting posture that supports the body's balance, alignment, and movement throughout the workday. Inspired by the posture of horse riding. The Norj positions the pelvis forward, opening the hips and aligning the spine in its optimal curve. This active seating position promotes improved core engagement, circulation, and alertness — helping reduce fatigue and tension often caused by traditional sitting

House Fabrics:

Gabriel Fighter fabric colour Black

150kg guarantee

6 yr warranty
