

Memory Foam with the Support of High-resilience Foam

Hygroflex® is a hybrid comfort foam, merging the luxurious adaptability of memory foam with the support of high-resilience foam. By redistributing pressure and maintaining the ideal balance of moisture and temperature, it enhances the sleep climate for healthier, more restful sleep. Hygroflex® is the go-to choice in healthcare, bedding and furniture industries for those who demand exceptional comfort and unmatched performance in every product.

Hygroflex® is backed by a 15 year comfort

The benefits of Hygroflex®

- **Shape Conforming:** adapts to the body of the user, offering a cushioning experience that enhances comfort without compromising mobility.
- **Friction Management:** provides superior friction and shear management, enhancing mobility and lowering the risk of pressure injuries.
- **Sleep Microclimate Control:** A well-regulated sleep microclimate is key to restful sleep. Hygroflex® delivers breathability, moisture-wicking, and heat dispersion—essential factors for maintaining a healthy sleep environment.
- **Antimicrobial Protection:** Hygroflex® is protected by CompriShield, a sustainable, bio-based microbial control solution that offers persistent protection from mould, mildew, dust mites, and odour for the product's lifetime.

GreenRate: Level A

Hygroflex® is proudly certified [Global GreenTag GreenRate: Level A](#), reflecting its highest commitment to low VOC emissions, health safety, eco-toxicity, and fit for purpose.

**STANDARD
100**
